sathyaram.com
Maryland · Remote / Hybrid

Front-end developer and digital designer with **10+ years** building end-to-end digital products, from branding and interface design through accessible, high-performance websites. Leveraging AI-assisted development to accelerate delivery, improve code quality, and create better outcomes for clients.

EXPERIENCE

Sathya Ram, LLC | Founder & Principal Developer

Mar 2020 – Present · Remote

- Delivered **23 websites** across healthcare, finance, higher education, nonprofit, and enterprise organizations, supporting properties with **20K-385K monthly page views**.
- Clients include Sanofi, Bank of America, Sodexo, and The Brookings Institution, alongside mission-driven organizations such as Patagonia's Home Planet Fund and The Sontag Foundation.
- Integrated AI tools including Claude Code, Codex, and Cursor into my development workflow to accelerate implementation, improve code quality, and shorten delivery timelines.
- Managed client engagements end to end, leading projects from discovery and UX strategy through visual design, development, testing, and launch while owning scoping, budgeting, timelines, stakeholder communication, and post-launch support.
- Designed brand identities, logos, and interfaces in Figma and Illustrator before developing custom and CMS-driven websites with an emphasis on accessibility, SEO, and quality assurance.
- Built responsive front ends in Next.js and custom WordPress themes, developing reusable component and design systems, modeling CMS content architecture, and handling deployment and hosting setup.

Forum One | Front-End Developer

Jan 2019 – Feb 2020 · Alexandria, VA

- Developed and launched **seven accessible WordPress websites** for clients including HHMI BioInteractive, the Vilcek Foundation, and the South Carolina Department of Labor, collaborating with UX, design, back-end, and PM teams to translate approved designs into responsive front ends.
- Gathered requirements directly with clients around business goals, content needs, design requirements, technical constraints, and accessibility, then coordinated iterative revision rounds through QA and launch using Git and Jira.
- Delivered custom theming, interface fixes, and ongoing maintenance across **nine additional commercial websites**.

Lehigh University | Senior Web Developer

Dec 2016 – Jul 2018 · Bethlehem, PA

- Designed and maintained the Lehigh Campus Portal on Ellucian Luminis, serving more than **250,000 monthly page views** for students, faculty, parents, and prospective applicants across the university.
- Built a reusable custom Drupal 7 theme adopted across **50+ university websites**, standardizing a consistent visual and front-end foundation across otherwise separate departmental sites.
- Conducted A/B testing, heatmap analysis, eye-tracking studies, and WCAG accessibility reviews to understand user behavior and identify usability issues, using those findings to guide interface and UX improvements.
